As part of its post-market surveillance and vigilance activities, the ANSM recommends that manufacturers use the [European Medical Device Nomenclature \(EMDN\)](#). This nomenclature is used for the registration of medical devices in the European database EUDAMED.

Annex XVI of Regulation (EU) 2017/745 (MDR) sets out the list of non-medical products which, due to their characteristics or intended use, are subject to the same requirements as medical devices in order to ensure the safety and health of users.
