# Recommandations concernant la recherche et le développement des médicaments pédiatriques

## Guidelines qualité

Guideline excipients in the labelling and package leaflet of medicinal products for human use

Guideline excipients in the labelling and package leaflet of medicinal products for human use - annexe

Guideline on pharmaceutical development of medicines for paediatric use

Reflection paper on formulations of choice for the paediatric population

Note of explanation to accompany publication of reflection paper on formulations of choice for the paediatric population (EMEA/CHMP/PEG/194810/2005)

Quality of medicines questions and answers

## Guidelines préclinique

Guideline on the need for non-clinical testing in juvenile animals of pharmaceuticals for paediatric indications

## Guidelines clinique (efficacité et sécurité d'utilisation)

International Conference on Harmonisation E 11 (R1): Clinical investigation of medicinal products in the paediatric population - Step 5

International Conference on Harmonisation E 11 (R1): Clinical investigation of medicinal products in the paediatric population - Step 5 - Addendum

Ethical considerations for paediatric trials	<input type="radio"/>
Guideline on the investigation of medicinal products in the term and preterm neonate	<input type="radio"/>
Guideline on the role of pharmacokinetics in the development of medicinal products in the paediatric population	<input type="radio"/>
Joint DIA/EFGCP/EMA better medicines for children conference 2016 on optimisation of drug development for the benefit of children (10-11/10/2016)	<input type="radio"/>
Guideline on the qualification and reporting of PBPK modelling and simulation	<input type="radio"/>
Reflection paper on the use of extrapolation in the development of medicine for paediatrics	<input type="radio"/>
Guideline on clinical trials in small populations	<input type="radio"/>
Guideline on good pharmacovigilance practices (GVP) for the paediatric population	<input type="radio"/>
Guideline on the evaluation of anticancer medicinal products in man	<input type="radio"/>
Guideline on the evaluation of anticancer medicinal products in man - Addendum on paediatric oncology	<input type="radio"/>
Addendum to the guideline on the evaluation of medicinal products indicated for treatment of bacterial infections to address paediatric-specific clinical data requirements	<input type="radio"/>
Guideline on recombinant and plasma-derived FVIII products rev. 2	<input type="radio"/>
Guideline on the development of new medicinal products for the treatment of Ulcerative Colitis	<input type="radio"/>
Guideline on clinical investigation of medicinal products in the treatment of epileptic disorders (Rev 3)	<input type="radio"/>
Guideline on the clinical investigation of medicinal products for the treatment of Duchenne and Becker muscular dystrophy	<input type="radio"/>
Concept paper on the impact of brain immaturity when investigating medicinal products intended for neonatal use	<input type="radio"/>
Concept paper on the impact of lung and heart immaturity when investigating medicinal products intended for neonatal use	<input type="radio"/>
Concept paper on the impact of liver immaturity when investigating medicinal products intended for neonatal use	<input type="radio"/>

Discussion paper on the impact of renal immaturity when investigating medicinal products intended for paediatric use

CHMP Safety Working Party's response to the PDCO regarding the use of PEGylated drug products in the paediatric population

Concept paper on the involvement of children and young people at the Paediatric Committee (PDCO)

Guideline on the investigation of medicinal products in the term and preterm neonate

Reflection paper on formulations of choice for the paediatric population

Note of explanation to accompany publication of reflection paper on formulations of choice for the paediatric population

Draft paper on the impact of brain immaturity when investigating medicinal products intended for neonatal use

Draft concept paper on the impact of lung and heart immaturity when investigating medicinal products intended for neonatal use

Draft concept paper on the impact of liver immaturity when investigating medicinal products intended for neonatal use

Discussion paper on the impact of renal immaturity when investigating medicinal products intended for paediatric use

Ethical considerations for clinical trials on medicinal products conducted with the pediatric population

## Guidelines multidisciplinaires

CHMP Safety Working Party's response to the PDCO regarding the use of PEGylated drug products in the paediatric population

Concept paper on the involvement of children and young people at the Paediatric Committee (PDCO)

Paediatric Gaucher disease : a strategic collaborative approach from EMA and FDA
