

Facilitating access to therapeutic innovation

Every health product provides benefits but also poses risks. This is referred to as the “benefit-risk balance”. **Our mission is to ensure that this balance is positive**, i.e. that the benefits to the patient are greater than the risks.

This applies from **the therapeutic innovation development stage**.

In this way, in the aim of facilitating safe access for patients to innovative products, ANSM intervenes in various ways to **support innovation and oversee measures to ensure its early, safe, and fair implementation**.

We also support the development of paediatric medicines.
