Our expertise

Consultez la version française

Our organisation has been designed to best address ANSM’s challenges, with expertise covering a broad therapeutic scope.

Our area of competence

ANSM acts in a public health role for all therapeutic areas:

- Oncology, haematology, nephrology
- Transfusion, transplantation, cell and gene therapy, nuclear medicine
- Cardiology, vessel-thrombosis-intensive care, antidotes-stomatology, ophthalmology
- Endocrinology, gynaecology and obstetrics, urology, allergology, pneumology, ENT
- Psychiatry, neurology
- Rheumatology
- Dermatology, enzyme deficiencies, internal medicine, hepatology, gastroenterology
- Virology, emerging diseases

In addition, within these therapeutic fields, all health products fall within the remit of ANSM’s scope.
