### **1.6.1. NON-GMO**

A similar product “Chloreprep, solution pour application cutanée” with a same composition is already approved in France.

The concerned medicinal product “Chlorhexidine alcoolique Gilbert Healthcare 2%” will be used with the same posology and same target population than the medicinal product “Chloraprep” currently in the market. So, there is an absence of significant increase of the environmental exposure.

According to the public assessment report of “ChloraPrep” the use of “Chlorhexidine alcoolique Gilbert Healthcare 2%” in hospital is unlikely to pose an unacceptable risk to the environment.
